Output Jack Pickup Style Manual

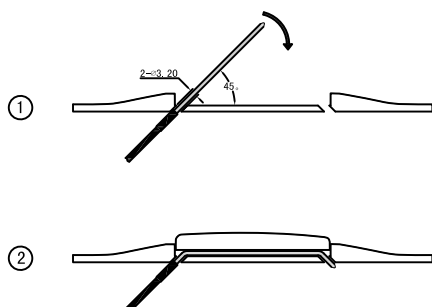

INSTALLATION

Step 1: Make a hole at the tail of the guitar with 12mm drill, then fit the output jack in.

Step 2: Pickup installation

- * Make clean and flat for bottom of bridge cavity.
- * cut at 45° in the end of the bridge cavity with 3.2mm hole, install the pickup according to pic ②.

Step 3: Place the battery bag with 9V battery in, tie up the spare cable then stick at the back inside of the guitar
