OUR COLLECTION YOUR CHOICE

HANDCRAFTED QUALITY – Established in 1994, Ortega Guitars introduced German design to authentic, traditional methods of guitar making. Committed to innovation and quality, we strive to raise the standard of every instrument we build. Features like the 12-hole bridge, typically found only on high-end guitars, come standard across our entry-level to professional nylon-string models. Our wide variety of body and neck sizes accommodates players of all ages, giving everyone the opportunity to learn and play. Inspections at multiple stages ensure that every instrument meets our highest standards before reaching your hands. We offer a wide range of stringed instruments and a full line of accessories to meet the needs of every musician. Discover the world of Ortega – tradition, innovation, and passion for music come together to create instruments that inspire.

DEVELOPED AND REFINED BY ORTEGA GUITARS
RECHARGEABLE PREAMPS WITH CAPACITOR TECHNOLOGY

For over three years, Ortega Guitars has been refining a technology that redefined amplified acoustic performance: rechargeable preamp systems powered by capacitor technology.

Developed, tested, and proven on countless live stages, these systems deliver stable power, consistent tone, and effortless handling – all without disposable batteries.

The MAGUS series offers a full range of solutions for different instruments and playing styles: MAGUS X, MAGUS FLY, MAGUS EXPRESS, and MAGUS PRO / RC – each designed for the demands of acoustic, classical, and stage instruments.

Together, they mark a milestone in preamplifying stringed instruments, uniting reliable electronics with a player-focused design.

Each system features a high-performance capacitor that recharges in minutes via USB-C and provides up to 10–15 hours of playtime

with a clean, noise-free signal and a sustainable power source that performs night after night.

This is not a concept – it's a proven standard across our lineup.

At Ortega Guitars, we continue to expand this technology to all instruments with onboard electronics, setting a new benchmark for modern, rechargeable performance.

Just charge, plug in, and play!

NYLON STRING GUITARS

REQUINTO SERIES

Rooted in Mexican and Latin American traditions, requinto guitars are smaller versions of classical guitars, featuring a shorter scale length and a notably deeper body depth. Our Requito Series guitars are ideal not only for Trío Romántico groups and traditional folk music but also for acoustic performances where amplification isn't an option. Their naturally louder projection sets them apart from typical small-body guitars.

NYLON STRING GUITARS

THERMO SERIES

Our thermo-treated nylon-string models use a revolutionary process that transforms select woods into "aged" tonewoods. Carefully heated in a vacuum chamber, moisture and resins are removed in a process that would otherwise take decades. The result is wood that's lighter, harder, and stronger, while retaining exceptional tonal response and resonance. This process also gives the spruce tops a rich, amber shine, adding an extra vintage aesthetic.

UKULELES BAMBOO SERIES

ECOTIP

At Ortega Guitars, sustainability is always an important factor when selecting materials for our products. There are few natural materials suitable for instrument building that are more sustainable than bamboo. This unique material grows quickly without replanting, and its grain pattern makes it stronger than many typical hardwoods.

SOUNDHOLE UHF WIRELESS SYSTEM

The **OSWS** is an innovative wireless pickup system available in two sizes: OSWS86 for classical guitars with 86 mm soundholes, and OSWS100 for acoustic guitars with 100 mm soundholes. Designed for guitarists without pre-installed pickups, OSWS enhances live performance and mobility without the need for complex modifications that could damage the guitar's natural sound and appearance.

Installation is as easy as fitting a soundhole cover, making OSWS ideal for occasional performances and straightforward acoustic amplification. It features reliable wireless transmission, maintaining guitar stability and aesthetics. With high-sensitivity microphones and an optimized audio processor, OSWS ensures clear sound quality while preventing feedback, delivering stable audio even in challenging stage conditions.

The OSWS Digital Wireless System:

- Easy to install – no tools needed
- 4-channel UHF band
- License-free within the frequency range
- Adjustable gooseneck microphone
- Rechargeable via USB-C (cable included)
- Up to 8 hours use on a single charge (charging time approx. 2 hours)
- 30 m range in open conditions

Includes:

1x Transmitter | 1x Receiver | 1x USB-C charger cable

DIGITAL WIRELESS SYSTEM

The Ortega Digital Wireless System features 2.4 Ghz digital technology and broadcasts incredible crystal-clear audio quality. Ready to use in seconds the system offers four operating channels (A, B, C, D), power/charge indicator and a rechargeable, built-in battery (+2500 charging cycles). The latency of < 5 ms and a full range frequency coverage of 20 Hz – 20 kHz secures great, detailed and real time sound.

The ODWS supports most active & passive systems as well as acoustic piezo devices*.

The ODWS Digital Wireless System:

- 2.4 GHz technology is permission free/approved for use in America (North and South), Europe, Asia and Australia**
- Up to 30 meters (100 ft.) of range without any dropout***
- Up to 4 systems simultaneously (4 channels – A, B, C, D)
- Rubberized SHOCKPROOF housing (ODWS-1 & ODWS-1BK)
- 24 bit/48 kHz uncompressed digital transmission
- Easy to start in seconds – plug & play
- Auto-standby (sleep mode) after 10 seconds when there is no signal
- One transmitter can serve multiple receivers
- Rechargeable via USB-C (cable included)
- Up to 5 hours use on a single charge
- Appx. 225° adjustable jack to fit almost every instrument
- THD + Noise: > 0.05% (1KHz @ -10dbFS)
- Dynamic Range: > 103 db A weighted
- Operating temperature: -10° to 50° celcius (14° F – 122° F)

Includes:

1x Transmitter | 1x Receiver | 1x USB double head charger cable

* Some high output active systems, especially active acoustic piezos might not match well with 2.4 GHz systems.

** Present legislation, please inform yourself about possible changes.

6-STRING GUITAR – ATMOSPHERE green

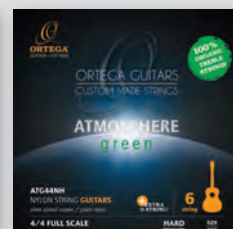

ORTEGA Guitars atmosphere green strings are created and manufactured in Italy. We replaced the usually oil based treble strings with a newly developed nylon material which is made from 100% plant-based products. Our Atmosphere Green strings deliver a perfect combination of bright, warmth, punchy tone and incredible projection. Precise intonation and long-lasting tuning stability add to their exceptional playability.

6-STRING GUITAR – ATMOSPHERE balance

Through our intensive engineering process, we calculate the windings, thickness, and core of the 3 bass strings. This process creates additional flexibility which increases vibration and resonance, ultimately delivering an extraordinary brightness and crystal-clear tonal experience. This creates a fully balanced string which delivers superior feel and tone.

ORTEGA LOVES LEFTIES!

As a left-handed player, you know how challenging it can be to find a stringed instrument with the exact features, fit, and feel you are looking for. At Ortega Guitars, we understand this firsthand. That's why we offer one of the widest selections of left-handed stringed instruments on the market.

In this catalog, you'll find 60 models of guitars, ukuleles, acoustic basses, mandolins, and banjos designed specifically for left-handed musicians. With a broad range of sizes, colors, neck widths, and configurations, you're certain to find the perfect instrument for your needs — without the typical "lefty upcharge"!

LEFT-HANDED NYLON STRING GUITARS

Ortega breaks barriers without losing focus on the fundamentals of classical guitar making. We are committed to honoring tradition while embracing modern processes. Features like two-way truss rods, 12-hole bridges, and a variety of scale lengths and nut widths help create a superior playing experience. Additionally, Ortega offers a wide selection of left-handed models without the typical "lefty" upcharge.
