

HOW DOES MEINL ENSURE THAT YOUR FAVORITE PAIR WILL ALWAYS FEEL THE SAME?

Drumsticks are the most important tool for any drummer. They bring out the beautiful tones of a cymbal or the sensitivity of a snare drum, and yet, they are a very personal choice. Today, a wide variety of models, sizes and types exists, and finding the right fit can be overwhelming. Meinl's solution was to create a focused line of high-quality sticks with clear differences in the framework of the sizes most commonly used.

Have you ever played two different sticks on your ride cymbal and noticed the sound change when you swapped the sticks? Many factors go into the reason this happens, and the R&D team at Meinl invested many hours in testing these differences. They decided to craft their sticks from a cymbal player's perspective so that every stick sounds great on cymbals first.

After all, making cymbals has been the family business for a long time.

Have you ever found your favorite stick model to be too light or too heavy when buying a new pair? The Meinl solution was to add a new step to how sticks are manufactured: weigh and sort the raw wooden dowels into designated models first.

Before being turned into sticks, the American Hickory and North American Hard Maple comes in the form of square dowels. Each dowel is shaped into a stick with a precise profile by computer-controlled cutting blades.

By sorting the raw dowels first, only lightweight hickory becomes Big Apple sticks (which are great for fast ride patterns) and likewise, dowels with the most weight will become the Heavy series (which features

increased diameters and thick tapered shoulders for endurance and heavy hitting). The final result is that your favorite pair feels the way you expect, every time.

Meinl sticks are proudly made in Germany. This means taking the time to check the quality at each point in the manufacturing process so that the Meinl family feels confident putting their name on each stick.

JAY POSTONES

JAY POSTONES SIGNATURE DRUMSTICK

Jay Postones and Meinl Stick & Brush built these sticks for speed, control, and power. Jay's subtle refinements make a big impact, and you'll feel the difference. The 16.5" length adds extra reach, while the short 2.78" taper keeps precision tight and gives the stick

a slightly weighted throw. A standard 0.565" grip ensures easy maneuverability. Jay also chose a round tip to dial-up clarity on all surfaces. Made from premium American hickory in a medium-light weight, they balance effortless movement with a solid, responsive feel.

"Fine-tuned for my specific playing style – the perfect drumstick does exist. We refined details so subtle they're almost invisible, yet you can absolutely feel the difference when playing. With a slightly longer design, the stick provides extra throw for greater power when needed. It's a beautifully balanced, versatile, and incredibly playable drumstick that I'm proud to put my name on."

GABE HELGUERA

GABE HELGUERA SIGNATURE DRUMSTICK

Gabe Helguera teamed up with Meinl Stick & Brush to craft a signature stick built for power and projection. The 0.580" diameter and 16.5" length provide solid feel with excellent control, rebound, and reach. Acorn tip delivers a full, defined sound on cymbals and drums – perfect for power and articulation.

"I set out to design a stick that could handle everything ... the intensity of an I Prevail show and also the finesse of a deep pocket groove. I needed power without losing feel. These sticks deliver both. They feel amazing, last forever, and honestly ... I've never loved a pair of sticks more."

CLAY AESCHLIMAN

CLAY AESCHLIMAN SIGNATURE DRUMSTICK

Clay Aeschliman's Meinl signature drumstick is designed for versatility and precision. The 0.580" diameter and 16.5" length provide solid feel with excellent control, rebound, and reach. Clay chose a round tip for strong attack and easy control on all playing surfaces.

CLAY AESCHLIMAN

Round Tip
Medium Hickory

"When designing this stick, it was really important to create something that would complement my playing style. I utilize a lot of double strokes, so it was crucial to have a stick with the heft and shape to dig into the drums on any surface with great rebound – whether it be the hi-hat or the floor tom – yet still remain balanced enough not to feel too large or overbearing. To achieve this, we took inspiration from marching sticks that I used from my drumline days, then furthered that with a design and scale that works for the drum set. I'm beyond thrilled with what we achieved, thanks to the amazing and hardworking team at Meinl Stick & Brush."

Clay Aeschliman

SIGNATURE DRUMSTICKS

MIGUEL LAMAS

MIGUEL LAMAS SIGNATURE DRUMSTICK

The Miguel Lamas signature drumstick combines thoughtful design with innovative craftsmanship. With a diameter of 0.575" and 16.0" length, this stick offers a compact, agile feel with medium-heavy weight for balanced power.

A double-layer finish provides enhanced grip and increased durability – ideal for extra control during intense playing. A round tip delivers strong attack and easy control on all playing surfaces.

"The double coat of lacquer gives me the perfect grip – secure, yet natural. Every cross-stick hit delivers a bold, powerful sound. At 16 inches long, this stick feels fast and responsive, yet still packs the punch I need for dynamic playing. The round tip and medium-heavy weight make it a true all-rounder – my go-to stick for any style. It just works ... and makes me sound my best."

Miguel Lamas

MIGUEL LAMAS

Medium-Heavy Hickory

EL ESTEPARIO SIBERIANO

"We spent a few months developing the perfect stick that works in every single style of music. Not only did we work on the diameter and length for balance, but we also found the weight I needed for durability. Now, each pair lasts longer than my last marriage. This is not just a drumstick. This is the tool I use to make a living, and I trust it with my life."

El Estepario Siberiano

SIGNATURE DRUMSTICKS

EL ESTEPARIO SIBERIANO SIGNATURE DRUMSTICK

El Estepario Siberiano and Meinl have created a signature stick together that features many classic elements but is specifically built to match his wide range of drumming capabilities from effortless grooves to 'must-see-to-believe' mechanics.

The result is a stick that perfectly blends versatility with speed and agility. Using select US hickory, this stick begins with

EL ESTEPARIO SIBERIANO

Acorn Tip
Medium Hickory

a medium-thin diameter of 0.555" for a standard grip that is just under a 5A and features an acorn tip for quintessential cymbal definition. To create a more modern feel, each dowel is cut to a unique length of 16.375", and when combined with the medium taper and medium weight, these sticks come alive around the kit and respond in any situation.

Ø 0.555" - 16.375" • SB605

LUKE HOLLAND

"After receiving my first official pair of signature drumsticks from Meinl Stick & Brush, I can confidently say this is the first time I have experienced the feeling of a drumstick becoming an extension of my arm, rather than an accessory to get the job done. As someone who needs a fluent combination of power & finesse, I am very proud of this stick & what it allows me to accomplish behind the kit."

Luke Holland

LUKE HOLLAND SIGNATURE DRUMSTICK

Precision accompanied by a smooth blend of speed and power is a quick way to describe Luke's incredible skills behind the kit, but that doesn't fully describe his unique ability. It is, however, an accurate description of his signature drumstick.

Starting with US selected hickory, the diameter falls between a 5A and 5B, which makes it work for many drummers and applications. A length just past 16" and short taper work together to achieve a great balance of both speed and power when needed.

CALVIN RODGERS

"When I began working on my signature stick with Meinl, my main objective was not only to create a stick that I love but to also create a stick that felt universal. I wanted a stick with consistent weight and feel all the way through. It needed to have a round tip that wouldn't be so taxing on my drumheads, but that was able to capture my infatuation with stick definition and dynamic sensitivity. Finally, it needed to be durable. Meinl paid attention to every single detail and delivered a drumstick far better than anything I could've ever imagined."

Calvin Rodgers

SIGNATURE DRUMSTICKS

CALVIN RODGERS SIGNATURE DRUMSTICK

Playing with inspiration and fire, Calvin Rodgers continues to set the standard for gospel and R&B drumming, only to raise that standard again and again.

Together Calvin and Meinl have created a signature drumstick that is not only great for maneuvering quickly around the kit, but also perfect for laying down deep and heavy grooves.

Starting with a 5A diameter and US selected hickory, this unique stick features a total length of 16.5" and a long taper designed for both reach and rebound in a stick made to play fast.

The round ball tip produces articulation and clarity on cymbals as well as drums, while the weight and balance supply the sensitivity and feel necessary for a great all-around stick.

SIGNATURE DRUMSTICKS

SIROS VAZIRI

SIROS VAZIRI SIGNATURE DRUMSTICK

The Siros Vaziri Signature Drumstick is a front-heavy, balanced hybrid tip stick that mixes power with control and articulation.

"I wanted to develop a stick that lets me play loud with minimal effort, while also keeping a soft and articulate cymbal sound. Meinl Stick & Brush really nailed it – this is without a doubt the best feeling stick I've ever held in my hands. The extra length and short taper give it a front-heavy feel, which lets me hit hard without actually doing

much. It's like a long hammer with extra weight at the top – you barely have to swing it and you still get a ton of force from it. The hybrid tip is the PERFECT contrast to that front-heavy feel. It makes the ride, hihat and ghost notes softer and more articulate. Fast or slow, loud or quiet – this stick is just perfectly balanced to give you what you need in any situation. It almost feels like it plays itself, and it can take a beating too. LOVE IT!"

ALEX RÜDINGER

ALEX RÜDINGER SIGNATURE DRUMSTICK

Alex Rüdinger's signature Meinl drumstick is based on our Heavy 2B model with added weight and density to pack more punch. Alex also chose a medium taper, so the extra weight feels balanced and not too heavy. These sticks are built for hard hitters; perfect for transferring more energy to drums and cymbals.

"My signature Meinl stick ticks all the boxes: The length, the taper, the weight... & most of all, the consistency! Each pair feels just like that last - it's honestly incredible. I based my new signature model off of their stock 2B, but expanded on it with more density & weight. It packs a punch, but doesn't feel too heavy. Perfectly balanced... you won't be disappointed."

Alex Rüdinger

SIGNATURE DRUMSTICKS

ANUP SASTRY

ANUP SASTRY SIGNATURE DRUMSTICK

Anup Sastry and Meinl created a signature stick that's large but agile. Anup's drumstick is based on our Heavy 2B model with increased length, medium taper, and light weight. This gives the drumstick incredible reach and power along with a lighter touch so it doesn't feel sluggish. An extra coat of thin lacquer increases grip.

"As a larger stick, it's very well balanced. Not too heavy, not too light. I've always wanted a stick that's slightly longer and thicker than an average 2B, but I didn't want it to feel sluggish or super heavy. It's the best of both worlds with the dimensions of a larger stick, but with the weight of something slightly smaller and more agile."

DRUMSTICKS

HYBRID DRUMSTICKS

Designed for drummers playing in diverse bands and multiple situations with a wide range of musical styles and genres.

The unique tip starts as an acorn shape, which is trimmed down to the classic barrel size for a hybrid design that produces a dark and smooth articulation on cymbals. Additional length and long taper give these sticks a quick response with greater rebound for fast chops and deep grooves.

Did you know that the Hybrid models feature a two-step taper?

Most drumsticks feature a single taper from the shaft diameter to the thinner diameter at the neck. The two-step process allows us to create a stick with greater response and more versatility. The first taper is long and gradual

which gives the stick more natural rebound. The second taper is short and reaches the neck diameter quickly. This equips the player with more forward weight and a heavy feel when desired. These two tapers work together

to create a very balanced stick overall, but players say the different tapers help them to get more out of their sticks when needed whether that is laying back for smooth, easy rebound or leaning in for quicker punch and attack.

DRUMSTICKS

HEAVY DRUMSTICKS

With increased length, diameter, and weight over the Standard models, these sticks are built for heavy hitters that want to transfer the energy from their sticks into their drums.

The shoulder has been thickened for greater durability. A thicker acorn tip generates powerful articulation and quick response around the drum kit.

Did you know MEINL weighs each dowel before cutting to make sure the final weight of the stick matches the model?

It's an important manufacturing step to ensure your favorite pair feels the way you expect every time. This also reduces waste and factory seconds.

BIG APPLE

BIG APPLE SWING DRUMSTICKS

Well-balanced sticks with a focused but light sound to swing all night on the bandstand.

The undersized acorn tip yields a sweet articulation on cymbals for maximum clarity while allowing them to breathe. A combination of light grade hickory or maple, plus a small tip, is great for drummers who want a stick that does not overpower their cymbals.

HD1 DRUMSTICK

A classic general use stick that is perfect for all ages and applications, from snare drum to full kit and classroom to stage, with an overall balanced feel.

The round tip is easy to control and responds consistently on all playing surfaces.

American Hickory provides strength and durability, and its weight is preferred for some applications such as practice.

HD2 DRUMSTICK

A large stick that plays lighter than its size for ease of control and full dynamic range, capable of working in all musical settings.

Its full 16" length and longer taper give this stick a quick rebound, and the barrel tip produces a woody stick definition with less mid-range overtones on cymbals.

American Hickory provides strength and durability, and its weight is preferred for some applications such as practice.

HD4 DRUMSTICK

A medium-thin stick that works for many applications but is best suited when volume control is needed.

A thicker shoulder gives this stick a solid feel in your hands with a great response. Barrel tip and slim diameter complement each other by producing good articulation, but do not overpower cymbals.

American Hickory provides strength and durability making it more suitable for some applications.

HD DRUMSTICKS

Concert HD sticks are made from American Hickory for greater durability and solid feel.

COMPACT

Scaling down length and diameter below what you typically see, our Compact Drumsticks are a great fit for drummers who prefer the balance and reach of a shorter stick around their drums and cymbals.

These models also play well on e-drums where striking surfaces are smaller than an acoustic kit. Plus, their size makes them ideal for younger drummers and students. Our Compact Drumsticks are made from the same grade of durable American Hickory as our standard size drumsticks.

COMPACT 15"

The 15" Compact Drumstick has a diameter of 0.530" with a medium taper and an oval tip.

This is a great choice if you're looking for a slightly smaller stick than our Standard series. Made from American Hickory for durability, a solid feel and outstanding response.

NANO STICK

Inspired by an idea from
Arthur Hnatek

"The Nano Stick has become my favourite trick for completely transforming the sound characteristics of my entire setup in a fraction of a second. It's almost like having a brand new instrument at your fingertips with a simple stick change. The amount of definition you get while decreasing the sustain of any vibrating surfaces is ideal for sculpting your sounds. For someone who's looking for the frontier between electronic and acoustic sound aesthetics, I'm extremely inspired by this device. Although it was primarily designed for creative recording situations, I have to say, I haven't played a show without it since!"

Arthur Hnatek

No tip: Maximum definition and top end attack with little overtones or wash.

Short taper:
Gives you a solid feel with greater durability

NANO STICK

Nano Sticks were designed for applications when more nuance and precision is desired or regular drumsticks are simply too loud.

NANO STICK

American Hickory
Light

The unique, slim diameter combined with the lack of a tip creates extreme definition on ride cymbals and hihats with very little overtones or wash. On drums, they produce top end attack without the bottom end frequencies. Additionally, these sticks allow you to play a drumkit at a whisper volume without losing definition. This means you can pull these out of the stick bag for specific expression and tones or to work within the limitations of certain gigs, such as small, intimate rooms. Nano Sticks were inspired by an idea from Meinl Stick & Brush artist Arthur Hnatek.

DRUMSTICKS

GIANT CYMBAL SWELLS & THUNDEROUS TOMS

PERCUSSION MALLET

Round Felt Tip
Light Hickory

SWITCH STICK 5A

Hybrid 5A Stick with
Hard Felt Mallet

PERCUSSION MALLET

A hybrid stick with a hickory handle designed for percussionists who need a stick for multiple instruments and surfaces.

Round felt-covered tip is soft enough to be safely used on hand drums and animal hide heads.

SWITCH STICK 5A

The Switch Stick 5A features our popular Hybrid 5A sticks (made from American Hickory) with a hard felt mallet added to the butt end.

This is a great combination for players that need to make quick changes from sticks to mallets or mallets to sticks during a performance.

MALLETS

Ever wished your mallets felt as good as your drumsticks?
We developed mallets for the drum set drummer so that
switching between sticks and mallets is a seamless transition.

SUPER SOFT MALLET

Hand-sewn
mallet head for a
super soft attack.

MEDIUM MALLET

Medium-soft felt
mallet head
for versatility.

HARD MALLET

Hard felt
mallet head for
more attack.

DRUM SET MALLETS

Our drum set mallets are
specifically designed for
drummers who need a
mallet for cymbal swells
and thunderous toms.

Featuring a 5A diameter handle
made from American Hickory
for strength and durability.

MALLETS

A VARIETY OF MATERIALS AND ALTERNATIVE SOUNDS

STANDARD MULTI-ROD BIRCH

Featuring 19 solid birch dowels arranged in a standard multi-rod configuration.

STANDARD MULTI-ROD BAMBOO

Featuring 19 solid bamboo dowels arranged in a standard multi-rod configuration.

FLEX MULTI-ROD BAMBOO

Solid bamboo dowels arranged for more flexibility than standard multi-rod models.

LIGHT MULTI-ROD BAMBOO

Lightweight bamboo multi-rod with less attack than our Standard model multi-rods, making it best suited for low volume situations.

MULTI-RODS

MEINL has been producing multi-rods for percussionists for many years. This line-up of multi-rods and brushes now includes a variety of materials, shapes and sizes so that all drummers and percussionists can find a new tool to add to their stick bag.

Ø 0.650" H 16.260" • SB200

Ø 0.650" H 16.025" • SB201

Ø 0.650" H 16.025" • SB202

Ø 0.630" H 15.160" • SB203

Be inspired to create new grooves or add layers of texture to your drumming.

SUPER FLEX MULTI-ROD NYLON

A nylon multi-rod that provides the most flexibility and durability, featuring a wooden handle.

Ø 0.650" H 16.025" • SB206

HEAVY MULTI-ROD HARDWOOD

Thick hardwood dowels for greater attack and volume.

Ø 0.650" H 16.260" • SB207

REBOUND MULTI-ROD BIRCH

Features a foam core in the center, surrounded by twelve birch dowels for a focused attack.

Ø 0.650" H 15.865" • SB208

REBOUND MULTI-ROD BAMBOO

Features a foam core in the center, surrounded by eleven bamboo dowels for durability and softer attack.

Ø 0.590" H 15.865" • SB209

MULTI-ROD BUNDLE STICKS

Our Multi-Rod Bundle Sticks can be used on all types of percussion instruments from cajon to drum kit.

They feature both an easy-to-grip handle and adjustable rings to achieve the desired amount of dowel spread.

MULTI-RODS

WIRE BRUSHES ARE A MUST-HAVE

STANDARD WIRE BRUSH

Retractable wires and push/pull rod allow drummers to quickly find the correct amount of spread and response needed.

Wire gauge: 0.013"

VINTAGE WIRE BRUSH

Featuring an exposed aluminum handle, this brush lacks the rubber sleeve most associated with modern brushes, giving it a retro look and smooth feel. Retractable wires and push/pull rod allow for easy spread adjustment.

Wire gauge: 0.012"

COMPACT WIRE BRUSH

The metal wires fully retract into the handle without a push/pull rod, making this brush more comfortable for matched grip players.

Wire gauge: 0.013"

With snappy and crisp slaps as well as lush sweeping tones, these brushes are a must-have in every drummer's bag.

7A FIXED WIRE BRUSH

Featuring a 7A sized wood handle that is made from US hickory, this brush utilizes thin gauge wires which are fixed in place for a perfect fan shape. The combination of a small diameter handle and the lightweight wires allows for more flexibility and sensitivity on drums and cymbals making them work especially well in lower volume situations.

Wire gauge: 0.013"

5A FIXED WIRE BRUSH

Featuring a 5A sized wood handle that is made from US hickory, this brush utilizes medium gauge wires which are fixed in place for a perfect fan shape. The combination of a medium diameter handle and mediumweight wires allows for these brushes to be used in a wide variety of applications from jazz to country and folk rock.

Wire gauge: 0.016"

5B FIXED WIRE BRUSH

Featuring a 5B sized wood handle that is made from US hickory, this brush utilizes heavy gauge wires which are fixed in place for a perfect fan shape. The combination of a large diameter handle and heavyweight wires allows for more volume and projection from drums and cymbals than typical brushes allow.

Wire gauge: 0.019"

BRUSHES

MASTER THE CLASSICS, EXPLORE NEW TERRITORY

Our straightforward line of brushes gives drummers and percussionists the tools they need to play the classics as well as explore new sounds and textures.

BAMBOO BRUSH

By using bamboo dowels in place of wires, we have created a unique type of brush. Drummers can use the fan shape in sweeping patterns or get a full and fat backbeat from their snare drum, and percussionists can use them on all types of instruments and effects.

FIXED NYLON BRUSH

A great alternative to wire brushes, this fixed nylon brush provides both flexibility and durability with a warmer sound.

RETRACTABLE NYLON BRUSH

A retractable nylon brush is a great tool for any percussionist or drummer – extremely durable nylon brushes easily glide in and out of the short handle.

LOW BASS TONES AND CRISP HIGHS

CAJON HUSK BRUSHES

Lightweight straw material bundled together creates a unique blend of sound between brushes and rods.

Husk Brushes can be used on all types of percussion instruments from cajon to drum kit.

STANDARD CAJON BRUSH

Our most popular brush for cajons allows the player to pull out low bass tones as well as crisp highs to simulate slaps.

Ø 0.865" H 14.290" • SB305

JUMBO CAJON BRUSH

Made for cajon players looking to get a bigger sound out of their instrument. The increased amount of brushes provides an even deeper bass response.

Ø 1.120" H 14.290" • SB306

CAJON HUSK BRUSH

Produces a thick, low-end thump on all kinds of drums and percussion instruments without the attack.

Ø 0.955" H 14.290" • SB307

BRUSHES

TIMBALES

Classic style timbales sticks made from American Hickory for strength and durability. The Timbales Sticks Long feature an extra half inch of reach for a total length of 16.5".

They can be used on many percussion instruments including timbales, cowbells, wood blocks and cymbals.

DIEGO GALÉ

SIGNATURE TIMBALES STICK

Hickory

Diego Galé's Signature Timbales Stick by Meinl offers extra reach, power, and rounded ends for better handling, perfect for percussionists seeking more than standard timbales sticks.

"I present my Diego Galé Signature Timbales Stick, designed for a deep, brilliant sound in the bells and forceful cascara play. Lightweight and balanced for comfort, they ensure a firm grip and versatility, making them ideal for recording and live performances. These sticks deliver flawless playability."

MANOLITO RODRIGUEZ

SIGNATURE TIMBALES STICK

Hickory

The Manolito Rodriguez Signature Timbales Stick is based on our ½" timbales stick with a little extra reach. It sits between our ½" and ½" long models.

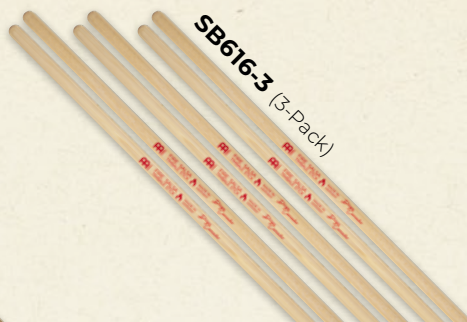

"With great enthusiasm I would like to present you my signature timbales stick. These timbales sticks come as a 1/2" size. This is a perfect grip and weight for me that helps with a balanced performance. Great for both traditional and modern styles. So enjoy it."

TIMBALES STICKS

ACCESSORIES

KINETIC DRUM KEYS

At 75 grams, the Meinl Kinetic Drum Keys are one of the heaviest on the market. The added mass allows them to stay in position while enabling quick drumhead changes. Available in antique bronze, black nickel or chrome.

PRACTICE PADS

The Meinl Stick & Brush practice pads are general use pads with a medium-soft rubber surface that work in all applications of drumming with any type of drumstick. The rubber surface provides a consistent rebound with a quiet response, and the base plate will fit into a snare stand or mount onto any 8 mm thread, such as a cymbal stand or boom arm.

Ø 6" • SB508

Ø 12" • SB509

STICK WAX

The Meinl Stick Wax creates a comfortable slip-free and tacky grip when applied to any drumstick or mallet – no matter the size or wood type. Simply rub the stick wax against your sticks and the grip will be improved immediately.

Made from beeswax, this is a natural product and should be kept in the aluminum can for storage.

SB507

SB503

DRUM TECH MULTI-TOOL

The Meinl Drum Tech Multi-Tool covers the essentials needed by drummers and drum techs: a drum key, flat screwdriver, Phillips screwdriver, socket wrench, hex drivers (2, 2.5, 3, 4, 5 mm), and a bottle opener. It attaches to any bag or case with the carabiner hook.

ACCESSORIES

STICK KEEPER

The Meinl Stick Keeper is an angle adjustable drumstick holder that can be attached to any cymbal stand or tubular drum hardware.

The round steel tube has an inner diameter of 1.8" (4,6 cm) to hold drumsticks, rods or brushes. With the Meinl Stick Keeper, you will always have your sticks within easy reach for quick changes while playing.

SB512

STICK GRABBER

The Stick Grabber is a simple and convenient holder that puts a pair of sticks within easy reach.

Holds up to two pairs of sticks. Angle adjustable. Attaches to any cymbal stand or tubular drum hardware.

SB504

STICK WRAP

The Meinl Stick Wrap provides a comfortable non-slip grip for any drummer or percussionist.

Included are two pairs of stick wrap and application tape.

SB502

5B BOTTLE OPENER

The 5B Bottle Opener is a fun way for any drummer to pop open a cold one.

SB505

SB511

7A DRUMSTICK PENCIL

Made from pine wood and equipped with graphite lead, the Meinl 7A Drumstick Pencil is a fun way for drummers and non-drummers alike to take notes, draw, write music, and drum wherever they are!

It features a diameter of 0.365" and a length of 8.7" combined with an oval tip and medium taper for a great balance and articulation on any surface. Perfect for air-drumming, desk drumming, or your next break room gig. Sold only in pairs (just like real drumsticks).

DRUMSTICK MAGNET

The Meinl Drumstick Magnet pair is made of two American Hickory miniature drumsticks with the Meinl Stick & Brush hybrid tip for a realistic look. They're a fun, compact and practical way to fix sheet music, setlists and notes to magnetic surfaces like metal music stands and most drum hardware. Also great to stick notes or photos to refrigerator doors.

SB513

DRUMSTICK KEYCHAIN

Consisting of two miniature sticks and one keyring, the Meinl Drumstick Keychain is a fun way to keep up with your important keys and stay connected to your instrument all the time.
